Week 4 Quiz LATEST SUBMISSION GRADE					
1(100%				
1.	The diagram for traditional programming had Rules and Data In, but what came out?	1 / 1 point			
	Answers				
	Binary				
	Machine Learning				
	Bugs				
	✓ Correct				

	O To make it train 10x faster	
	O To make it classify 10x faster	
	O Purely Arbitrary	
	The dataset has 10 classes	
	✓ Correct	
3.	What is a Convolution?	1 / 1 poi
	A technique to make images smaller	
	A technique to make images larger	
	A technique to extract features from an image	
	A technique to remove unwanted images	

	✓ Correct	
4.	Applying Convolutions on top of a DNN will have what impact on training?	1
	O It will be slower	
	O It will be faster	
	There will be no impact	
	It depends on many factors. It might make your training faster or slower, and a poorly designed Convolutional layer may even be less efficient than a plain DNN!	

	✓ Correct
5.	What method on an ImageGenerator is used to normalize the image?
	normalize
	○ flatten
	rezize()
	rescale
	✓ Correct

When using Image Augmentation with the ImageDataGenerator, what happens to your raw image data on-disk.
A copy will be made, and the copies are augmented
A copy will be made, and the originals will be augmented
Nothing
The images will be edited on disk, so be sure to have a backup

7.	Can you use Image augmentation with Transfer Learning?	1/1 point
	O No - because the layers are frozen so they can't be augmented	
	Yes. It's pre-trained layers that are frozen. So you can augment your images as you train the bottom layers of the DNN with them	
	✓ Correct	
8.	When training for multiple classes what is the Class Mode for Image Augmentation?	1/1 point

class_mode='multiple'

class_mode='non_binary'

class_mode='categorical'

class_mode='all'

✓ Correct
